Kazakh, Russian, English

PROFILE

Hi, I'm Nurbek, front-end programmer passionate about creating exceptional user interfaces. With two years of experience, I specialize in HTML and CSS, the fundamental building blocks of web development. At 17, I'm driven by curiosity and eager to explore the evolving world of front-end development. I stay updated on the latest trends and technologies to deliver modern, visually stunning websites.

EXPERIENCE

In my role, I have been responsible for crafting visually appealing and user-friendly interfaces by leveraging the power of HTML and CSS. I have developed a deep understanding of HTML semantics, ensuring the proper structure and accessibility of web pages. By utilizing CSS, I have been able to transform static designs into dynamic and responsive layouts, employing techniques such as flexbox and grid to achieve optimal visual presentation across different devices and screen sizes.

I have worked on various projects where I have collaborated closely with designers and back-end developers, translating their visions into pixel-perfect implementations. I have experience in creating and styling different types of elements, including forms, navigation menus, and interactive components, using CSS selectors, properties, and animations to bring them to life.

Additionally, I have a keen eye for detail and maintain a strong commitment to writing clean and maintainable code. I strive to follow best practices and stay up to date with the latest advancements in HTML and CSS, regularly exploring new features and techniques to enhance my skill set.
